

SOLUTIONS FOR DAMAGED PIPE

LEAK REPAIR

Presented by:

ARE PIPELINE LEAKS COSTING YOU?

Pipeline leaks are not only dangerous from a safety and environmental standpoint, but they also can lead to costly shut-ins if replacement is necessary. With many years of experience, TOPCOR Offshore provides offshore and plant operators with proprietary leak repair products and services that can avoid shut-ins.

TOPCOR OFFSHORE HAS THE EXPERIENCE AND EXPERTISE

Every pipeline leak is different and as a result, requires a different approach in its repair. Some leaks can be repaired with patches while others may require clamps. TOPCOR Offshore expert personnel are able to draw upon past experience and knowledge of composite technologies to determine what type of repair has the greatest chance of long-term success.

DON'T LET A PIPELINE LEAK FORCE YOU INTO A COSTLY REPAIR

The next time you experience a pipe leak, call TOPCOR Offshore and let one of our experienced technicians evaluate the leak and propose a viable long-term solution. We would like the opportunity to repair the leak at a cost considerably less than the alternative of shutting-in and replacing the leaking pipe.
