

# OFFSHORE SERVICES

Presented by:

## Corrosion Protection and Repair

TOPCOR Offshore is a full service corrosion protection and repair company, focused on providing alternative solutions to many common offshore maintenance problems. Drawing on our experience with composites, we are able to provide operators with turnkey corrosion protection and repair services for a wide range of problems associated with offshore structures. Our unique approach to protection and repair in challenging offshore environments allows us to provide our customers with proven solutions that can be counted on to reduce maintenance cost and avoid production loss.

## Cost Effective Solutions

TOPCOR Offshore offers corrosion protection and repair services for risers, process piping, caissons and conductors as well as structural members. We have experience with traditional steel structures and with concrete platforms, piles and piers. We can provide inspection and evaluation services in order to identify, assess and then provide our customers with the best and most cost efficient method of affecting corrosion protection and structural repairs. With our highly trained field technicians and divers, we are able to draw upon a broad range of experience and expertise which provides our customers with the assurance that they are receiving the best and most cost effective solutions

## Broad Range of Services

In addition to composite installations, TOPCOR Offshore offers a wide variety of services designed to integrate all phases of offshore facility maintenance, protection and repair. We offer blasting and painting, underwater inspection services, pipeline tie-ins, topside and underwater welding services, grating replacement, and concrete restoration in addition to cathodic protection surveys and anode placement. We are a sole source provider and invite you to contact us.
